8-POINT MICRO-ADJUSTMENT

BT8390-VESA400MAP
# UNIVERSAL POP-OUT INTERFACE ARMS WITH MICRO-ADJUSTMENT

These screen interface arms for the System X range add pop-out functionality to video walls and other multi-screen applications, making installation and service access as quick and simple as possible. Available in pairs, the arms are universally compatible with all video wall screens and their modular design allows an almost endless number of video wall configurations to be assembled, in both landscape and portrait orientations. Screen alignment is made simple using the included 8-point micro-adjustment feature and for added security, a pop-out prevention mechanism is included and can be enabled as desired to avoid accidental or unauthorised release of the screens.

SPECIFICATION

|	
Recommended screen size	39" - 65"
Max load	50kg
