XTRFY M4 ULTRA-LIGHT GAMING MOUSE

DESIGNED IN
SWEDEN

ULTRA-LIGHT, ERGONOMIC, TOP-GRADE. MEET THE M4.

Lightweight construction. State-of-the-art components. Unique, right-handed shape. The M4 takes the performance, feel and durability of lightweight gaming mice to the next level.

"It's time for lightweight mice to meet the demands of esporters. Based on feedback from our network of pro gamers and the gaming community in general, we've created a mouse that's incredibly light yet top-performing and durable. With a right-handed, ergonomic shape for the right grip and feel."

Erik Jensen, CTO

STAND OUT. IN-GAME AND IRL.

Starting Project 4, it was clear. The new mouse wasn't only going to make an impression in-game – we wanted to create something special for all gamers out there. The M4 comes in no less than 5 different versions, including a Retro edition.
"Growing up, it was all about Star Wars, Commodore 64, Atari and Nintendo. For us, that's where it all started. The Retro edition is a trip down memory lane and a tribute to the early years of gaming."

Joakim Jansson, CEO

LIGHTWEIGHT DESIGN. ERGONOMIC SHAPE.

The M4 is the first ultra-light gaming mouse with an ergonomic, right-handed design – uniquely constructed to weigh less without compromising on shape and feel. Formed by feedback from professional esporters as well as casual gamers, the result is a brand new shape and size.

PATENT PENDING

3389 STATE-OF-THE-ART SENSOR.

With Pixart's highest-performing gaming sensor, you're ready for the next level. On-the-fly sensitivity settings from 400 to 16 000 CPI. 125–1000 Hz polling rate. 400 IPS. Self-adjusting FPS. Translation: Top-grade performance.

GRIP AND FEEL.

The M4 glides smoothly on 100 % PTFE skates with rounded edges. While the matte UV coating in combination with the structure of holes make for an even better grip over the ergonomic mouse body. Enhancing airflow under your palm, the holes also help you stay comfortable.

STRONG CONSTRUCTION. DURABLE COMPONENTS.

The shell of the mouse is thoroughly engineered to minimize weight while retaining durability. On the inside, the glowing Xtrfy logo is surrounded by nothing but quality components. Our Omron switches will give you 20 million pro-player optimized clicks.

RGB ILLUMINATION.

With customizable lighting, it's easy to add your personal touch to the M4. Choose your color. Switch between numerous LED effects. Adjust the brightness. Or turn the illumination off. All settings are made directly on the mouse.
ULTRA-LIGHT IS EVEN LIGHTER WITH THE EZCORD.

To make smooth swipes even smoother, we created the Xtrfy EZcord. Softer, lighter and more flexible. With a color to match your choice of mouse.

ARM 32-BIT MICROCONTROLLER.

Fast swipes require high-speed processing. The M4 is powered by an ARM 32-bit microcontroller for uncompromising speed and stability.

DUST AND SPLASH RESISTANT.

We've covered the inside of the mouse in conformal coating to protect the components against dust, splashes and LAN night mishaps.

WINNING INGREDIENTS:

Pixart 3389 optical gaming sensor
Adjustable RGB LED illumination
Weight: 71 g (excluding cable)
Main switches: Omron 20M(OF)
Cable: 1.8 m Xtrfy EZcord
PTFE glides
UV coated surface
CPI button (400–16000)
Polling rate switch (125/500/1000 Hz)
OS: Win XP/Mac OSX 10.1 or later
Warranty EU/US/ASIA: 2/1/1 years
