

SAITEK

Farming Simulator

TAKE CONTROL OF YOUR VIRTUAL FARM

- Saitek and GIANTS Software teamed up to build this Farm Sim Controller that adds to the thrill of cultivating land, nurturing livestock and selling goods.

900-DEGREE ROTATION STEERING WHEEL

- The 900-degree rotation steering wheel offers the realistic rate of rotation for a tractor steering wheel and highly accurate control, ensuring your crops are harvested efficiently.
- Removable turn knob for easier one-handed turning.

ENJOY YOUR FARM'S FRESH AIR

- As good as it feels to cruise your farm in heavy machinery, sometimes you just have to get your hands dirty. Those in-game situations call for sticks and buttons, and the wheel has a cornucopia of them. Twin analog sticks, each with a push-down button, are ideal for moving your character and controlling your camera. Plus, the 4-way hat switches near each stick provide eight more buttons at your fingertips.
- Two ergonomic, trigger-like buttons reside on the back. This built-in control scheme gives you precision command of your farmer, and everything is programmable from within the game. Whether using your chainsaw, walking into the barn, or simply going for a sunset stroll to admire your crops, all controls are at the ready.

INTEGRATED DUAL ANALOGUE STICKS

Integrated dual analogue sticks mean you don't need to switch between different controllers for different tasks – whether driving or on foot, you have full control from the steering wheel.

SIDE PANEL LOADER CONTROL STICK

The Side Panel's realistic front loader control stick gives you the sensation of true control over heavy machinery. Even complex logging machines like tree harvesters, cranes, chainsaws, chippers or trailers are rendered simple to operate thanks to the side panel loader control stick with its 6 axes.

SET-AND-FORGET CRUISE CONTROL SPEED DIAL AND 37 PROGRAMMABLE BUTTONS

Set-and-forget cruise control speed dial and 37 programmable buttons give you the flexibility to control your entire farm from just the one controller.

DURABLE CLAMP

The durable clamp, featuring Saitek's proven screw-thread adjustment, ensures your controller stays locked in place on your desk.

SYSTEM REQUIREMENTS

Windows® 7, Windows® 8, Windows® 8.1 and Windows® 10

Wheel

Vehicle side panel
